EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. This examiner's amendment amends claim 1, 29-32 in conformance with the remarks on page 14, 3rd paragraph of the amendment submitted on November 28, 2006 in which claim 6 is incorporated to claim 1 and claims 29-32 are reinstated from the canceled claims 19-22. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claim:

Please replace claim 1 with the following:

1. (Currently Amended) A train detection system for detecting the presence and/or position of a railway vehicle within a detection area of a railroad track, the railroad track having a pair of rails and an identified impedance within the detection area, and wherein the presence and/or position of the railway vehicle within the detection area changes the impedance of the track, said train detection system comprising:

a first transmitter connected to the rails of the railroad track for transmitting along the rails a first signal having a predetermined magnitude and a predetermined operating frequency;

a receiver connected to the rails for receiving the first signal;

a first data acquisition unit coupled to the first transmitter and the receiver and responsive to the transmitted first signal and the received first signal to generate first

multiplexed analog signal representing the transmitted first signal and the received first signal, wherein the first data acquisition unit includes:

a first feedback circuit for detecting a first transmitted voltage signal applied to the rails via the first transmitter, a first current signal transmitted along the rails via the first transmitter, and a first received voltage signal received by the receiver;

a first filter coupled to the first feedback circuit for filtering the detected first transmitted voltage signal, the detected first transmitted current signal, and the detected first received voltage signal; and

a first multiplexer coupled to the first filter for multiplexing the filtered first transmitted voltage signal, the filtered first current signal, and the filtered first received voltage signal to generate the first multiplexed analog signals, and wherein the processor calculates the impedance in the approach detection area as a function of the difference between first transmitted voltage signal and the first received voltage signal, and the first transmitted current signal;

a first converter for converting the first multiplexed analog signal into a plurality of first digital signals corresponding to the transmitted first signal and the received first signal; and

a processor responsive to the first digital signals for processing the first digital signals to determine the frequency and magnitude of the transmitted first signal and the received first signal.

In claim 29, line 1, replace "claim 18" with - claim 28 -

In claim 30, line 1, replace "claim 18" with - claim 28 -

Art Unit: 3661

In claim 31, line 1, replace "claim 18" with - claim 28 -

In claim 32, line 1, replace "claim 21" with - claim 31 --

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

On page 4 of the Amendment filed on February 28, 2006, the applicant mistakenly requests replacing paragraph [0077] with a new paragraph. The replacement requested should be applied to paragraph [0074] instead. Therefore, the examiner requests that paragraph [0077] be remained as originally filed. Paragraph [0074] should be replaced with the amended specification stated on page 2 of the amendment submitted on November 28, 2006.

Reasons for Allowance

Refer to the Reasons for Allowance stated in the Office Action mailed on August 28, 2006.

Art Unit: 3661
